

# Biological Merging In Married Couples

- Over time there are more and more biological similarities between spouses.
  - Even down to the cellular level, according to a study by Nature Immunology.
  - Same habitat, same food, same germs, same romantic life, etc.
- Drake Baer says there is an almost poetic way of describing these biological similarities as “couples concordance in health.”

*Spiritual Merging*

being transformed

*This is the end goal for  
the church! – Eph. 4*

being transformed
